

I'm not robot!

defective or broken blocks are to be thrown out and carted away. The cement mortar is to be well worked and prepared in small quantities sufficient for immediate use and used fresh. No mortar is to be mixed with any other mortar. The blocks in 1:3 cement sand mortar shall be placed in position such that the horizontal and vertical joints are completely filled with mortar. The thickness of joints shall not be more than 10 mm. 8. STRUCTURAL STEELWORK The welding of the screens (DRG. No. 11) is to be carried out in accordance with the recommendations set out in the British Code of Practice CP 113/102 Arc Welded Construction. 9. PAINTING Remove all scale from unprired steelwork by flame cleaning, wire brushing chipping or scraping, degrease with white spirit and immediately prime. All coats of paint are to be thoroughly dry before the application of any subsequent coat and no paint is to be applied to external work during inclement weather nor on any moist surface. The appropriate time as indicated by the paint manufacturer is to elapse between the application of each coat. Steelwork is to be primed on the same day that it is cleaned and all coats of priming are to be maintained in good condition until the undercoating is applied by touching up all damage during the progress of work. Each coat of paint is to be a tint distinguishable from the previous coat. In no case is the last coat to be applied until the Engineer's permission has been obtained.ANNEX 5 Bill No.....
